

Plans for our dock area:

On March 10<sup>th</sup> we worked out a lease agreement for the ministry building for 5 years. After 5 years the building will be ours free and clear. With this decision, we are now able to move forward with the building of a new dock area.

Currently the old dock is old and is constructed of wood and is 8' x 24' and will not handle a lot of weight. The new dock will be made of block and concrete which will support heavier loads. The plans are for it to be increased to 24' x 40'. We will do it in two sections. We are asking for mission ministry assistance money for this. This section will be 16 x 24 and the estimate cost with most of labor donations is around \$5500 for fill and gravels and concrete and we may have to pay to have the blocks laid.

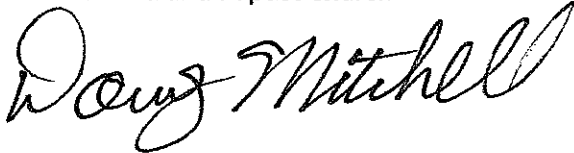

We would like to be done with first part of construction by August if not sooner. Then we can start phase 2 which will be 24 x 24. The completed project will be 40 x 24 total. Total estimated cost for phase 2 will be around \$7500.

The total cost of completed project is \$13000 but we pray to do this job for under \$10000. Next project will be to put a covering over the top to protect from the weather... We are hoping to do this in 2014.

Thank you

Bro. Doug Mitchell

Pastor of Midland Baptist Church
